SUMMARY OF QUALIFICATIONS

Cybersecurity student pursuing a B.S. in Cybersecurity Analytics and Operations with CompTIA Security+ and CySA+ certifications. Hands-on experience in Linux systems, virtualization, networking, log analysis, and security-focused lab environments. Skilled in analyzing logs, troubleshooting technical issues, and working across Windows and Linux systems. Seeking cybersecurity internship, co-op, or entry-level security operations opportunities.

EDUCATION & CERTIFICATIONS

A.S. Software Engineering, Thaddeus Stevens College of Technology — **May 2026**

B.S. Cybersecurity Analytics and Operations, Pennsylvania State University Berks — **Expected Dec. 2028**

Certifications:

- CompTIA Security+ (Active)
- CompTIA CySA+ (Active)
- CompTIA CSAP – Security Analytics Professional (Stackable Certification)

TECHNICAL SKILLS

Systems: Windows 10/11, Linux (Ubuntu), Active Directory (User & Group Management, GPO Basics) | **Networking:** TCP/IP, DHCP, DNS, HTTP/HTTPS, OSI Model | **Virtualization:** Proxmox VE, VirtualBox | **Monitoring & Logs:** Windows Event Viewer, Sysmon, Log Analysis | **Tools:** Task Manager, Git, Wireshark (basic packet inspection) | **Languages:** Python, Java, SQL, PHP, JavaScript

PROFESSIONAL EXPERIENCE

Mary's Daycare Center, LLC | Remote

Software Engineering Intern

Jan 2026 – May 2026

- Developed and maintained web application features using modern web technologies.
- Assisted with deploying and configuring Linux-based web servers to host and support web applications.
- Troubleshoot application issues and configuration problems affecting website functionality.
- Tested application features and fixes to ensure functionality and reliability.
- Collaborated with stakeholders to implement updates and improve user experience.

Thaddeus Stevens College of Technology | Lancaster, PA

Software Engineering Tutor

2025 – 2026

- Tutored students in Python, Java, and web development and Backend.
- Mentored peers in debugging and problem-solving while communicating technical concepts clearly to non-technical students.

SECURITY & TECHNICAL PROJECTS

Virtualized IT Lab Environment (Windows/Linux Systems)

- Deployed and configured multi-VM Windows and Linux lab environment.
- Installed and configured operating systems and networking components.
- Diagnosed and resolved network connectivity issues across Windows and Linux systems using TCP/IP troubleshooting methods
- Simulated real-world IT scenarios by configuring systems, users, and network settings in a multi-VM environment
- Configured Sysmon and Windows Event Viewer to generate and review system and security events.

Burp ClusterBomb Tools | Python 3.8+, Burp Suite, SQLi, SSRF, Automation

- Developed Python automation scripts integrated with Burp Suite for SQLi and SSRF testing.
