SUMMARY

CompTIA Security+, CySA+, and CSAP certified analyst with hands-on SOC lab experience in Splunk SIEM, Sysmon, and structured log analysis. Software engineering graduate with a developer's approach to detection, automation, and root-cause analysis, targeting SOC Analyst and Security Operations roles.

EDUCATION & CERTIFICATIONS

B.S. Cybersecurity Analytics and Operations, Pennsylvania State University Berks — **Expected Dec. 2028**

A.S. Software Engineering, Thaddeus Stevens College of Technology — **May 2026**

Certifications:

- **CompTIA Security+ (Active)** | **CompTIA CySA+ (Active)** | **CompTIA CSAP – Security Analytics Professional**

SECURITY & TECHNICAL PROJECTS

SOC Homelab | Proxmox VE, Splunk Enterprise, Splunk Universal Forwarder, Sysmon, Windows 10, Ubuntu Server

- Built a segmented multi-VM SOC lab in Proxmox VE, isolating lab traffic from management via separate networks.
- Deployed Splunk Enterprise with Universal Forwarder to centralize Windows and Linux log ingestion; authored SPL queries to search and validate endpoint telemetry across hosts.
- Tuned Sysmon with SwiftOnSecurity config to capture process creation, network connections, and file I/O events; integrated rsyslog pipeline for Linux syslog forwarding into Splunk.
- Root-caused a missing-data gap to a Windows hostname mismatch by ruling out network connectivity and configuration failures through structured troubleshooting methodology.
- Deploying Kali Linux VM to simulate adversary techniques and validate detection coverage against endpoint telemetry.

TryHackMe | Jr. Penetration Tester Path & SOC Level 1 Path

- Completed the Jr. Penetration Tester learning path, gaining hands-on experience with web application attacks, network exploitation, Burp Suite, privilege escalation, and adversarial methodology.
- Completed Blue Team Intro, SOC Team Internals, and Core SOC Solutions modules from SOC Level 1; triaged phishing alerts in the SOC Simulator by analyzing email headers, URLs, and artifacts to classify true and false positives.

Burp Suite ClusterBomb Automation Toolkit | Python, Burp Suite

- Built Python tools to automate SQLi (boolean-based, error-based, time-based) & SSRF detection using Burp Suite.
- Developed during web application security training to reduce manual effort in vulnerability testing workflows.

WORK EXPERIENCE

Thaddeus Stevens College of Technology | Lancaster, PA

Software Engineering Tutor | 2025 – 2026

- Provided one-on-one and group instruction in Python, Java, web development, and backend programming concepts.
- Guided students through debugging, troubleshooting, and problem-solving methodologies.
- Communicated technical concepts to students of varying experience levels, improving comprehension and confidence.

The Home Depot | Wyomissing, PA

Garden Associate | 2024 – Present

- Delivered customer service in a fast-paced retail environment by assisting customers, maintaining inventory accuracy, and prioritizing tasks to ensure efficient store operations.

TECHNICAL SKILLS

Security Operations: SIEM (Splunk), Log Analysis, Endpoint Monitoring

Security Tools: Splunk, Sysmon, Wireshark, Burp Suite, Nmap, Git

Operating Systems: Windows 10/11, Ubuntu Linux

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, OSI Model

Identity & Access Management: Active Directory (User and Group Management, GPO Fundamentals)

Virtualization: Proxmox VE, VirtualBox

Programming: Python, Java, SQL, JavaScript, PHP

Portfolio: darlin883.github.io/Portfolio
